## ADA LOUNGE

### Chiseled Wood

Carvings of wood, stone, and other materials, are a major art form in Native American culture and have a rich history. Many tribes have made carving and sculpting foci of their art for centuries and carvings are now found in homes all over the world. Ancient wood carving is impressive because from primitive tools to the introduction of a steel knife, native men were able to create decorative wooden utensils, like animal effigies. They used chisels, scrapers, gouges, and axes to create major woodworking projects.

The Ada Daybed is crafted from a solid chiseled oak base and has an elevated cushion seat. The daybed is wrapped in a contrasting boucle fabric with exquisite piping . The perfect partner when looking for a quiet place to read.
